Statistical report— Annual Wage Review 2022–23

All Australian Bureau of Statistics (ABS) data in this Report are seasonally adjusted, unless otherwise noted.

All data expressed in \$ units are in nominal terms, unless otherwise noted.

All gross domestic product (GDP) and gross value added (GVA) measures used in this Report are expressed in real terms from chain volume estimates, unless otherwise noted.

This report uses unit record data from the Household, Income and Labour Dynamics in Australia (HILDA) Survey conducted by the Melbourne Institute of Applied Economic and Social Research at the University of Melbourne on behalf of the Australian Government Department of Social Services (DSS), with data collection conducted by Roy Morgan Research. The findings and views reported in this paper, however, are those of the authors and should not be attributed to the Australian Government, DSS, or any of DSS' contractors or partners. DOI: [10.26193/3QRFMZ](https://doi.org/10.26193/3QRFMZ).

1. Economic growth

Chart 1.1: Economic growth, annual and quarterly growth rates

Source: ABS, *Australian National Accounts: National Income, Expenditure and Product*, December 2022.

Chart 1.2: Components of GDP growth, December quarter 2022

Note: Household consumption refers to 'Household final consumption expenditure', Investment refers to 'Gross fixed capital formation', and Public demand refers to 'General government final consumption expenditure'. Contributions may not add to total GDP growth due to rounding.

Source: ABS, *Australian National Accounts: National Income, Expenditure and Product*, December 2022.

Chart 1.3: International comparisons of quarterly GDP growth rates

Source: OECD (2023), *Quarterly GDP (indicator)*, viewed 27 April 2023, <<http://data.oecd.org/gdp/quarterly-gdp.htm>>.

Chart 1.4: Real net national disposable income, real GDP and the terms of trade, index

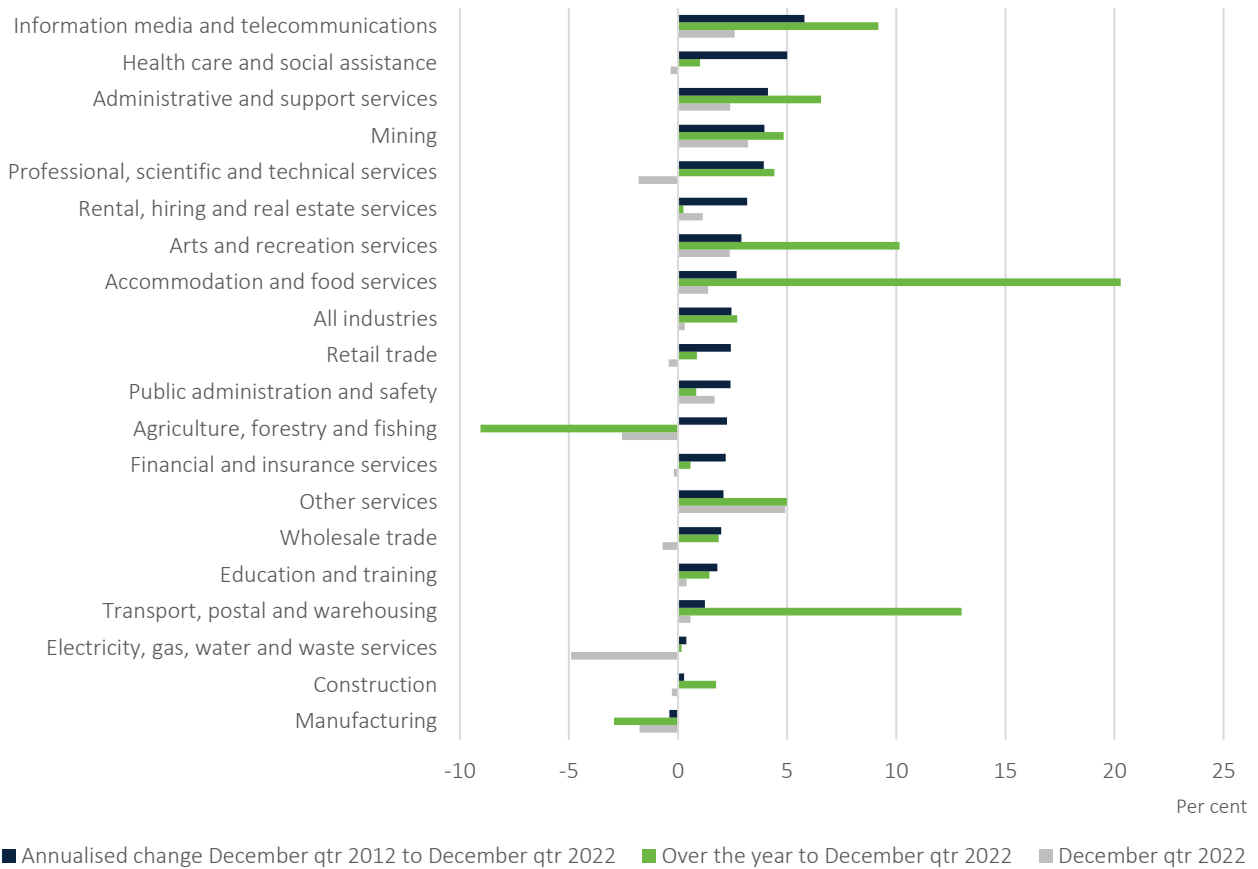

Note: Real net national disposable income (RNNDI) takes into account the impact of changes in prices of exports relative to imports, the real impact of income flows between Australia and the rest of the world, and the consumption of fixed capital. Income flows between Australia and the rest of the world are fairly smooth over time and changes tend to have little impact on short-term movements in RNNDI. The consumption of fixed capital tends to stall growth in RNNDI but, for the most part, the impact on short-term movement is small. See ABS, *Real net national disposable income - a new national accounts measure*, Feature article in ABS, *Australian National Accounts: National Income, Expenditure and Product*, December 2001.

Source: ABS, *Australian National Accounts: National Income, Expenditure and Product*, December 2022.

Chart 1.5: Gross value added by industry, average annual growth over decade, growth over year to the December quarter 2022 and growth in the December quarter 2022

Source: ABS, *Australian National Accounts: National Income, Expenditure and Product*, December 2022.

Chart 1.6: Gross fixed capital formation share of GDP

Note: All data are expressed in nominal and annual terms. Non-mining market sector excludes Education and training, Public administration and safety, Health care and social assistance and Mining, but includes ownership of dwellings.

Source: ABS, *Australian System of National Accounts*, 2021–22 financial year.

Table 1.1: Gross value added, by industry

	December qtr 2021	September qtr 2022	December qtr 2022
	(\$m)	(\$m)	(\$m)
Agriculture, forestry and fishing	15 795	14 742	14 364

Chart 1.7: Household savings ratio

Source: ABS, *Australian National Accounts: National Income, Expenditure and Product*, December 2022.

Chart 1.8: Household spending, annual growth, current price, calendar adjusted

Note: Calendar adjusted estimates account for trading day impacts and length of month. As the indicator time series lengthens, seasonally adjusted estimates will become available.

Source: ABS, *Monthly household spending indicator*, March 2023.

Chart 1.9: Household spending by spending category, annual growth, current price, calendar adjusted

Note: Calendar adjusted estimates account for trading day impacts and length of month. As the indicator time series lengthens, seasonally adjusted estimates will become available. Until such time, it is advised to focus on the through the year movements. Data for the most recent three months was not published for Alcoholic beverages and tobacco but is included in the totals.

Source: ABS, *Monthly household spending indicator*, March 2023.

2. Productivity

Chart 2.1: Measures of productivity, indexes—Dec-12 = 100

Note: Labour productivity is measured as real GDP per hour worked. Gross value added measures the value of output at basic prices minus the value of intermediate consumption at purchasers' prices. The market sector includes all industries except for Public administration and safety, Education and training and Health care and social assistance.

Source: ABS, *Australian National Accounts: National Income, Expenditure and Product*, December 2022.

Table 2.1: Measures of productivity, growth rate over the year

	GDP per capita	RNNDI per capita	GDP per hour worked	GVA per hour worked—market sector
Quarter	(% change)	(% change)	(% change)	(% change)
Dec-12	1.0	-1.8	2.1	3.7
Dec-13	0.9	0.3	2.0	2.0
Dec-14	0.6	-1.9	1.7	2.5
Dec-15	1.2	-2.4	0.2	0.6
Dec-16	1.0	4.8	1.8	2.1
Dec-17	0.8	0.1	-0.8	-1.2
Dec-18	0.8	2.1	0.7	1.4
Dec-19	0.7	1.9	0.7	0.4
Dec-20	-0.6	2.7	2.4	3.1
Dec-21	4.0	3.3	2.0	2.5
Dec-22	0.8	2.2	-3.5	-5.2

Note: The percentage change is calculated in relation to the corresponding quarter of the previous year.

Source: ABS, *Australian National Accounts: National Income, Expenditure and Product*, December 2022.

Chart 2.2: Productivity cycles, average annual growth in the market sector

Note: Multifactor productivity is measured as output per combined unit of labour and capital. Capital deepening is the component of labour productivity growth which is due to the increase in the amount of capital that each unit of labour has to work with. Labour productivity is represented by the numbers above the bars and is the sum of multifactor productivity and capital deepening. Due to rounding, the sum of multifactor productivity and capital deepening may not equal labour productivity. The current productivity cycle from 2017-18 is incomplete.

Source: ABS, *Australian System of National Accounts*, 2021-22 financial year; ABS, *Estimates of Industry Multifactor Productivity*, 2021-22 financial year.

Table 2.3: Average annual change in labour and multifactor productivity by industry

	2009–10 to 2017–218		2017–18 to 2021–22

Source: ABS, *Australian National Accounts: National Income, Expenditure and Product*, December 2022.

3. Business competitiveness and viability

Chart 3.1: Profits and wages shares of total factor income

Note: Profits share represents the returns to capital in the process of production and is expressed as total corporation gross operating surplus as a proportion of total factor income. Wages share represents the returns to labour in the process of production and is expressed as total compensation of employees as a proportion of total factor income.

Source: ABS, *Australian National Accounts: National Income, Expenditure and Product*, December 2022.

Table 3.1: Profits and wages shares of total factor income, year on year growth rates

	Wages share of total factor income	Total compensation of employees	Profits share of total factor income	Total corporation gross operating surplus	Gross mixed income	Gross mixed income
Quarter	(%)	(% change)	(%)	(% change)	(%)	(% change)
Dec-12	53.3	4.3	27.4	-3.9	8.7	-2.2
Dec-13	52.8	3.5	27.7	5.8	8.7	5.3
Dec-14	53.6	2.9	25.6	-6.4	9.7	13.3
Dec-15	54.6	3.1	24.6	-2.9	9.4	-1.8
Dec-16	52.2	2.1	26.6	15.7	10.0	12.7
Dec-17	53.0	5.2	26.4	3.0	9.3	-2.9
Dec-18	52.4	4.8	27.7	11.3	8.9	0.8
Dec-19	52.8	5.3	27.9	5.2	8.3	-2.2
Dec-20	51.2	2.8	29.3	11.0	9.2	17.1
Dec-21	50.5	5.4	29.8	8.8	9.6	12.3
Dec-22	50.0	10.4	31.8	18.9	8.6	-0.5

Note: Wages share is the compensation of employees expressed as a proportion of total factor income. Compensation of employees is defined as the total remuneration, in cash or in kind, payable by an enterprise to an employee in return for work done by the employee. Compensation of employees is not payable in respect of unpaid work undertaken voluntarily, including the work done by members of a household within an unincorporated enterprise owned by the same household. Compensation of employees excludes any taxes payable by the employer on the wage and salary bill (e.g. payroll tax).

Profits share represents the returns to capital in the process of production and is expressed as total corporation gross operating surplus as a proportion of total factor income. Gross operating surplus is defined as the operating surplus accruing to all enterprises, except unincorporated enterprises, from their operations in Australia. It is the excess of gross output over the sum of intermediate consumption, compensation of employees, and taxes less subsidies on production and imports. It is calculated before deduction of consumption of fixed capital, dividends, interest, royalties and land rent, and direct taxes payable, but after deducting the inventory valuation adjustment. Gross operating surplus is also calculated for general government and is equal to general government's consumption of fixed capital.

Gross mixed income is defined as the surplus or deficit accruing from production by unincorporated enterprises. It includes elements of both compensation of employees (returns on labour inputs) and operating surplus (returns on capital inputs).

The percentage change is calculated in relation to the corresponding quarter in the previous year.

Source: ABS, *Australian National Accounts: National Income, Expenditure and Product*, December 2022.

Table 3.2: Wages share of total factor income, mining and non-mining industries

Chart 3.4: Business bankruptcy rates

Note: The bankruptcy rate is calculated as the number of business-related bankruptcies divided by the number of owner managers of an unincorporated enterprise and is adopted from Bickerdyke I, Lattimore R, and Madge A (2000), *Business Failure and Change: An Australian Perspective*, Productivity Commission Staff Research Paper, Ausinfo, Canberra. Data are expressed in original terms.

A business-related bankruptcy was previously identified if the *main cause* of bankruptcy was from a business-related case. From 2020, a business-related case can be reported as *one of many* reasons causing bankruptcy and the debtor must have operated a business in the last 5 years.

Source: ABS, *Labour Force, Australia, Detailed*, March 2023; Australian Financial Security Authority, *Quarterly personal insolvency statistics*, December quarter 2022, <<https://www.afsa.gov.au/about-us/statistics/quarterly-personal-insolvency-statistics>>.

Chart 3.5: Business entry, exit and net entry rates

Note: Entry rates are business entries in the financial year as a proportion of total businesses operating at the start of the financial year. Exit rates are total business exits in the financial year as a proportion of total businesses operating at the start of the financial year. Net entry rates are the difference between the entry and exit rates and represent the percentage growth in the number of businesses over the respective financial year.

Source: ABS, *Counts of Australian Businesses, Including Entries and Exits*, various.

Chart 3.5a: Business entry, exit and net entry rates, employing businesses

Note: Net entry rate represents the net rate of change in the total number of employing businesses over the respective financial year. These include new businesses and existing businesses that have moved from a non-employing business to an employing business, as well as business exits and business that have moved from an employing to a non-employing business.

Source: ABS, *Counts of Australian Businesses, Including Entries and Exits*, various.

Chart 3.6: Business survival rates

Note: A surviving business is defined as a business which was actively trading in the first period and continued to be trading in the second period.

4. Inflation

Chart 4.1: Measures of inflation—Consumer Price Index, underlying inflation and Living Cost Index for employee households, growth rates

Note: Consumer Price Index (CPI) measures quarterly changes in the price of a ‘basket’ of goods and services which account for a high proportion of expenditure by the CPI population group (i.e. metropolitan households). The Living Cost Index (LCI) for employee households measures the change in the price of a ‘basket’ of goods and services which is based on the expenditure of employee households whose principal source of income comes from wages and/or salaries. CPI and LCI data are expressed in original terms.

Underlying inflation is calculated as the average of the trimmed mean and weighted median. The trimmed mean is calculated by ordering the CPI expenditure class components by their price change in the quarter and taking the expenditure weighted average of the middle 70 per cent of these price changes. The weighted median is the price change of the component in the middle of this ordering.

Source: ABS, *Consumer Price Index, Australia*, March 2023; ABS, *Selected Living Cost Indexes, Australia*, March 2023.

Chart 4.2: Measures of annual CPI growth, monthly and quarterly series

Note: Data are expressed in original terms. The monthly CPI indicator represents up-to-date prices for between 62 and 73 per cent of the weight of the CPI basket.

Source: ABS, *Consumer Price Index, Australia*, March 2023; ABS, *Monthly Consumer Price Index Indicator*, March 2023.

Table 4.1: Consumer Price Index, underlying inflation, Living Cost Index for employee households, index and growth rate over the year

Quarter	Consumer Price Index (Index)	Consumer Price Index (% change)	Underlying inflation (Index)	Underlying inflation (% change)	Employee LCI (Index)	Employee LCI (% change)
Dec-12	100.0		100.0		100.0

Chart 4.3: Consumer Price Index, underlying inflation and Living Cost Index for employee households, cumulative growth rates

Note: CPI and the LCI data are expressed in original terms. Underlying inflation is the average of the trimmed mean and weighted median.

Source: ABS, *Consumer Price Index, Australia*, March 2023; ABS, *Selected Living Cost Indexes, Australia*, March 2023.

Table 4.2: Measures of underlying inflation, growth rates over the year

Quarter	Trimmed mean	Weighted median
	(% change)	(% change)
Dec-12	2.2	2.6
Dec-13	2.7	2.6
Dec-14	2.2	2.4
Dec-15	2.1	2.0
Dec-16	1.5	1.2
Dec-17	1.7	2.0
Dec-18	1.8	1.8
Dec-19	1.5	1.3
Dec-20	1.2	1.3
Dec-21	2.7	2.6
Dec-22	6.9	5.6
Mar-23	6.6	5.8

Note: The trimmed mean is calculated by ordering the CPI expenditure class components by their price change in the quarter and taking the expenditure weighted average of the middle 70 per cent of these price changes. The weighted median is the price change of the component in the middle of this ordering. The percentage change is calculated in relation to the corresponding quarter in the previous year.

5. Wages

Chart 5.1: Measures of nominal wages growth, quarterly and cumulative growth rates, index

Note: The Wage Price Index (WPI) is an index for total hourly rates of pay excluding bonuses that is unaffected by changes in the quality or quantity of work performed. Average weekly ordinary time earnings (AWOTE) is calculated by dividing estimates of weekly ordinary time earnings by estimates of the number of employees. Ordinary time earnings refer to earnings attributable to award, standard or agreed hours of work. It is calculated before taxation and other deductions such as superannuation. It also excludes payments which are not related to the reference period such as overtime, leave loading and redundancy payments. AWOTE estimates refer to full-time adult employees, where an adult is defined as those who are 21 years or over as well as employees who, although under 21 years of age, are paid at the full adult rate for their occupation. AWOTE data are published half-yearly in May and November and a quarterly series has been derived. AWOTE data are expressed in original terms. Average annualised wage increase (AAWI) measures the average percentage increase in the base rates of pay across federal enterprise agreements approved in each quarter. It does not take into account payments such as allowances, bonuses and increases linked to productivity. The AAWI index is calculated by first deriving a quarterly rate. The C14 and the C10 are minimum award rates set under the *Manufacturing and Associated Industries and Occupations Award 2010* and the *Manufacturing and Associated Industries and Occupations Award 2020*. AENA is average earnings in the National Accounts, represented by Average compensation per employee.

6. Labour market

Table 6.1: Employment, monthly hours worked and unemployment

Year ended	Employed persons	Monthly hours worked	Unemployed persons	Unemployment rate	Employed persons	Monthly hours worked	Unemployed persons	Unemployment rate
(Month)	('000s)	('000s)	('000s)	(%)	(% change)	(% change)	(% change)	(ppt change)
Dec-12	11 395.5	1 603 625.7	654.7	5.4	1.5	1.0	6.3	0.2
Dec-13	11 417.4	1 605 966.9	716.1	5.9	0.2	0.1	9.4	0.5
Dec-14	11 596.2	1 601 484.1	754.2	6.1	1.6	-0.3	5.3	0.2
Dec-15	11 903.8	1 651 299.5	725.3	5.7	2.7	3.1	-3.8	-0.4
Dec-16	12 032.4	1 673 890.0	745.2	5.8	1.1	1.4	2.8	0.1
Dec-17	12 444.4	1 720 575.2	739.7	5.6	3.4	2.8	-0.7	-0.2
Dec-18	12 709.9	1 748 623.9	672.1	5.0	2.1	1.6	-9.1	-0.6
Dec-19	12 966.3	1 783 692.8	691.3	5.1	2.0	2.0	2.9	0.0
Dec-20	12 859.4	1 750 098.0	905.7	6.6	-0.8	-1.9	31.0	1.5
Dec-21	13 295.0	1 824 497.5	578.6	4.2	3.4	4.3	-36.1	-2.4
Dec-22	13 778.4	1 886 849.4	502.9	3.5	3.6	3.4	-13.1	-0.6
Mar-23	13 884.4	1 914 191.1	507.0	3.5	3.3	5.5	-7.5	-0.4

Note: The unemployment rate is the number of unemployed persons expressed as a percentage of the labour force. All measures are calculated for persons aged 15 years and over. The percentage change and percentage point (ppt) change are calculated in relation to the corresponding month in the previous year.

Given large month-to-month changes during the COVID-19 pandemic period, resulting in multiple trend breaks, the ABS recommends caution when using trend estimates during this period. Therefore, seasonally adjusted data are presented in this chapter.

Chart 6.8a: Proportion of all underemployed persons, by industry and gender, February 2023

Note: Data are in original terms.

Source: ABS, *Labour Force, Australia, Detailed*, March 2023.

Chart 6.9: Hours-based underemployment rate and proportion employed part time, by industry, 2021–22

Note: The hours-based underemployment rate is calculated as the number of additional hours sought by underemployed persons expressed as a percentage of the total available hours of labour supply. The total available hours of labour supply are defined as the number of hours actually worked in all jobs plus the number of hours sought by the underemployed persons. Hours sought by unemployed persons are not included. Hours sought but not worked is taken from the Labour Force Survey. Proportion of those employed part-time by industry is calculated at the May quarter 2022.

Source: ABS, *Labour Account Australia*, December 2022; ABS, *Labour Force, Australia, Detailed*, February 2023.

Chart 6.10: Job vacancies, annual growth and job vacancy rate

Note: The ABS define the job vacancy rate as job vacancies as a proportion of the labour force.

7. Award reliance

Chart 7.1: Method of setting pay

Note: Awards refers to the proportion of employees in an industry that are paid exactly the award rate and are not paid more than that rate of pay. As defined by the ABS, individual arrangements include registered or unregistered individual agreements and owner managers of incorporated businesses. Estimates of the proportion of employees on awards and collective agreements in 2016 have been revised on the basis of the 2018 conceptual treatment of these methods of payment. Owner managers of incorporated businesses comprised the following proportion of all employees: 2012 = 3.3%; 2014 = 3.4%; 2016 = 3.6%; 2018 = 3.8%; 2021 = 4.1 %.

Table 7.1: Award reliance by industry

	2012 (%)	2014 (%)	2016* (%)	2018* (%)	2021 (%)
All industries	16.1	18.8	22.4	22.5	23.0
Mining	0.6	0.8	0.1	0.9	1.1
Manufacturing	11.3	15.7	17.7	20.8	19.1
Electricity, gas, water and waste services	4.3	6.9	6.5	4.1	5.8
Construction	10.6	13.7	19.7	16.6	13.4
Wholesale trade	8.1	11.9	16.8	16.1	10.0
Retail trade	25.6	28.5	34.5	30.1	29.6
Accommodation and food services	44.8	42.8	42.7	44.9	60.4
Transport, postal and warehousing	7.3	10.9	11.9	12.7	12.6
Information media and telecommunications	5.7	5.2	5.5	7.1	7.3
Financial and insurance services	4.7	5.0	3.6	5.2	5.1
Rental, hiring and real estate services	20.9	22.1	27.2	29.4	22.1
Professional, scientific and technical services	6.0	9.9	9.3	8.0	5.7
Administrative and support services	29.0	37.3	42.0	41.3	42.4
Public administration and safety	6.9	12.8	15.2	10.9	13.0
Education and training	6.8	5.1	8.5	10.0	7.8
Health care and social assistance	19.0	22.3	27.8	31.7	33.3
Arts and recreation services	19.7	22.0	26.2	22.5	26.6
Other services	24.6	25.1	34.3	38.1	38.1

Note: * Only presented for non-managerial employees in 2016 and 2018 as data for all employees by method of setting pay and industry are not available. Estimates of the proportion of employees on awards and collective agreements in 2016 have been revised on the basis of the 2018 conceptual treatment of these methods of payment.

Award reliance refers to the proportion of employees in an industry that are paid exactly the award rate and are not paid more than that rate of pay.

Source: ABS, 'A Guide to Understanding Employee Earnings and Hours Statistics', Feature Article, in *Employee Earnings and Hours, Australia*, May 2018; ABS, *Employee Earnings and Hours, Australia*, various.

Table 7.2: Economic indicators by award-reliant industries

	Accommodation and food services	Administrative and support services	Other services	Health care and social assistance	Retail trade	All industries
Percentage of employees reliant on award wages, May 2021 ^a	60.4	42.4	38.1	33.3	29.6	23.0
Gross value added: percentage growth over the year to December quarter 2022	20.3	6.6	5.0	1.0	0.9	2.7
Company gross operating profits: percentage growth over the year to December quarter 2022 ^b	57.0	2.5	24.4	n/a	17.9	16.0
Business entry rate, over year to June 2022	19.4	31.1	25.3	18.2	20.3	19.7
Business exit rate, over year to June 2022	14.6	16.4	12.3	9.1	13.2	12.7
Wage Price Index: percentage growth over the year to December quarter 2022 ^a	3.5	3.5	3.7	3.0	3.9	3.4
Percentage annual wage growth under new collective agreements December quarter 2022	2.8	2.7	3.5	2.4	3.6	3.0
Employment: percentage increase over the year to February quarter 2023	4.9	0.8	1.5	4.8	5.7	3.0
Hours worked: percentage increase over the year to February quarter 2023	9.5	3.8	6.8	7.0	6.4	5.0

Note: (a) All industries excludes Agriculture, forestry and fishing; (b) All industries excludes Education and training, Health care and social assistance and some subdivisions of Finance and insurance services. n/a = not available.

The award-reliant industries selected are the five industries with the highest proportion of employees reliant on award rates of pay according to the Employee Earnings and Hours 2021 survey. The WPI and actual hours worked data are expressed in original terms. Due to a temporary suspension in the trend series, employment data are expressed in seasonally adjusted terms.

Entry rates are business entries in the financial year as a proportion of total businesses operating at the start of the financial year. Exit rates are total business exits in the financial year as a proportion of total businesses operating at the start of the financial year.

8. Relative living standards

Table 8.1: NMW relative to median weekly earnings of full-time employees

Month	NMW	Median earnings of full-time employees in main job	Ratio of NMW to median earnings in main job
	(\$)	(\$)	(%)
Aug-12	606.40	1150	52.7
Aug-13	622.20	1153	54.0
Aug-14	640.90	1208	53.1
Aug-15	656.90	1233	53.3
Aug-16	672.70	1250	53.8
Aug-17	694.90	1284	54.1
Aug-18	719.20	1344	53.5
Aug-19	740.80	1380	53.7
Aug-20	753.80	1430	52.7
Aug-21	772.60	1500	51.5
Aug-22	812.60	1525	53.3

Note: Median earnings refers to the level of earnings that divides the distribution into two groups of equal size, one having earnings above and the other below that amount. The median is less affected by outliers and skewed data than the mean. The median earnings data reflects revised estimates as result from a rebenchmarking of estimates. Median earnings are presented to the nearest dollar.

Source: ABS, *Characteristics of Employment, Australia*, various; Fair Work Australia/ Fair Work Commission decisions.

Table 8.2: Two-thirds of median weekly earnings

Year	COE (\$)	EEH (\$)
2012	766.67	808.00
2013	768.67	n/a
2014	805.50	879.33
2015	822.10	n/a
2016	833.33	917.33
2017	856.00	n/a
2018	896.00	973.33
2019	920.00	n/a
2020	953.33	n/a
2021	1000.00	1062.00
2022	1016.67	n/a

Note: Data for both measures of median weekly earnings include amounts salary sacrificed. Weekly earnings from the COE are earnings in the main job for full-time employees and are for August of each year. Weekly earnings from the EEH are weekly total cash earnings for full-time non-managerial adult employees. The figures are for May of each year. n/a = not available.

Source: ABS, *Characteristics of Employment, Australia*, various; ABS, *Employee Earnings and Hours, Australia*, various.

Chart 8.1: Growth in NMW, C10, AWOTE, AWE and WPI, index

Note: See Chart 5.1 for information on the WPI and AWOTE. Average weekly earnings (AWE) is the gross (before tax) earnings of employees (excluding salary sacrifice). AWOTE and AWE are published half-yearly for May and November, hence, a quarterly series has been derived. AWOTE and AWE data are expressed in original terms. The C10 are minimum award rates set under the *Manufacturing and Associated Industries and Occupations Award 2010*. In the Annual Wage Review 2019–20, the operative date of the variation to the C10 rate was on 1 November 2020.

Source: ABS, *Average Weekly Earnings, Australia*, November 2022; ABS, *Wage Price Index, Australia*, December 2022; *Manufacturing and Associated Industries and Occupations Award 2010*; *Manufacturing and Associated Industries and Occupations Award 2020*.

Chart 8.2: Real weekly total earnings (full-time adult non-managerial employees) by percentile and the real NMW, index

Note: Earnings data for 2014, 2016, 2018, and 2021 are based on full-time non-managerial employees paid at the adult rate.

Source: ABS, *Consumer Price Index, Australia*, December 2022; ABS, *Employee Earnings and Hours, Australia*, various; *Manufacturing and Associated Industries and Occupations Award 2010*; *Manufacturing and Associated Industries and Occupations Award 2020*.

Table 8.3: Ratio of selected percentiles to the mean and median of real weekly total earnings (full-time adult non-managerial employees)

	2012	2014	2016	2018	2021
Ratio of selected percentiles to mean real earnings					
10 th percentile	0.56	0.56	0.55	0.56	0.56
25 th percentile	0.68	0.67	0.67	0.67	0.68
50 th percentile	0.88	0.87	0.88	0.88	0.88
75 th percentile	1.19	1.18	1.18	1.20	1.19
90 th percentile	1.57	1.57	1.57	1.56	1.55
Ratio of selected percentiles to median real earnings					
10 th percentile	0.63	0.63	0.63	0.64	0.64
25 th percentile	0.77	0.77	0.76	0.76	0.76

Note: Earnings data for 2014, 2016, 2018, and 2021 are based on full-time non-managerial employees paid at the adult rate. Median earnings refer to the level of earnings that divides the distribution into two groups of equal size, one having earnings above and the other below that amount. The median is less affected by outliers and skewed data than the mean.

Source: ABS, *Employee Earnings and Hours, Australia*, various.

Chart 8.3: C14 rate relative to median earnings of employees in main job

Note: Median earnings are measured in August of each year. Following the amendments to the *Workplace Relations Act 1996* (Cth) taking effect in 2006, the Federal Minimum Wage (FMW) was set at \$12.75 per hour, equivalent to \$484.50 per week. The C14 rate in 2020 reflects the amount as at 1 November 2020 (\$753.80). Earnings are for employees including owner managers of incorporated enterprises.

Median earnings from 2004 onwards are taken from the COE survey, with median hourly earnings of adult employees sourced from unpublished COE data. The median earnings data reflect revised estimates as a result of rebenchmarking.

Table 8.4: Nominal disposable income of selected NMW-reliant households

Household type	Disposable income	Change		
	July 2022	July 2021 to July 2022	July 2021 to July 2022	July 2017 to July 2022
	(\$pw)	(\$pw)	(%)	(%)
Single adult	717.34	12.04	1.7	15.0
Single parent working FT, 1 child	1000.37	21.94	2.2	13.4
Single parent working PT, 1 child	673.07	29.10	4.5	13.7
Single parent working FT, 2 children	1115.03	25.86	2.4	12.9
Single parent working PT, 2 children	787.73	33.02	4.4	13.0
Single-earner couple (with NSA/JSP)	942.18	8.73	0.9	16.8
Single-earner couple	728.11	8.84	1.2	14.1
Single-earner couple, 1 child (with NSA/JSP)	1138.69	15.79	1.4	14.5
Single-earner couple, 1 child	1000.37	21.94	2.2	13.4
Single-earner couple, 2 children (with NSA/JSP)	1260.31	19.71	1.6	14.5
Single-earner couple, 2 children	1115.03	25.86	2.4	12.9
Dual-earner couple	1123.64	32.04	2.9	15.7
Dual-earner couple, 1 child	1312.38	33.58	2.6	12.9
Dual-earner couple, 2 children	1427.04	37.50	2.7	12.5
CPI			6.1	13.9

Note: The percentage change in the CPI over July 2021 to July 2022 and July 2017 to July 2022 were calculated with reference to the June quarter. CPI data are expressed in original terms.

Assumptions: Single-earner households earn 100 per cent of the weekly NMW. Single parents working part time (PT) earn 50 per cent of the weekly NMW, those working full time (FT) earn 100 per cent. Dual-earner households comprise one partner earning 100 per cent of the NMW, the other earns 50 per cent. Applicable NMW rates per week are: \$694.90 in July 2017; \$772.60 in July 2021 and \$812.60 in July 2022.

Tax/transfer parameters as at July each year. Disposable income includes all available income transfers, unless otherwise specified. Children are aged 8–12 years and attending primary school. Households paying sufficient rent to receive maximum Rent Assistance where applicable. From 20 March 2020 the Newstart Allowance (NSA) was replaced by the JobSeeker Payment (JSP). Single-earner couples are modelled in two scenarios: 1) the non-earning partner is in the labour force and receiving proportional rates of NSA or JSP and 2) the non-earning partner is not in the labour force and therefore not in receipt of NSA or JSP. Single-parent households and secondary earners in dual-earner households are not seeking further work and not in receipt of income support.

Source: ABS, *Consumer Price Index, Australia*, December 2022; Fair Work Commission modelling.

Table 8.5: Modelling the 2022 NMW increase, wage increase retained and components of change in disposable income of selected NMW-reliant households, July 2022

Household type	Change in disposable income	Components of change			NMW increase retained
		Wage increase	Taxes	Transfers	
		(\$ pw)	(\$)	(\$)	
Single adult	29.60	40.00	-10.40	0.00	74.0
Single parent working FT, 1 child	30.40	40.00	-9.60	0.00	76.0
Single parent working PT, 1 child	20.00	20.00	0.00	0.00	100.0
Single parent working FT, 2 children	30.40	40.00	-9.60	0.00	76.0
Single parent working PT, 2 children	20.00	20.00	0.00	0.00	100.0
Single-earner couple (with NSA/JSP)	5.60	40.00	-10.40	-24.00	14.0
Single-earner couple	26.40	40.00	-13.60	0.00	66.0
Single-earner couple, 1 child (with NSA/JSP)	9.11	40.00	-11.68	-19.21	22.8
Single-earner couple, 1 child	30.40	40.00	-9.60	0.00	76.0
Single-earner couple, 2 children (with NSA/JSP)	9.11	40.00	-11.68	-19.21	22.8
Single-earner couple, 2 children	30.40	40.00	-9.60	0.00	76.0
Dual-earner couple	49.60	60.00	-10.40	0.00	82.7
Dual-earner couple, 1 child	33.64	60.00	-10.40	-15.96	56.1
Dual-earner couple, 2 children	33.64	60.00	-10.40	-15.96	56.1

Note: Tax/transfer parameters as at July 2022. The NMW increase retained is calculated as the change in disposable income as a proportion of the wage increase. Other assumptions as per Table 8.4.

Source: Fair Work Commission modelling.

Chart 8.4: Growth in real weekly household disposable income for selected NMW-reliant households, index

Note: Tax/transfer parameters and NMW rate as at July of each year. Other assumptions as per Table 8.4. Between July 2013 and July 2014, the income-free threshold for NSA/JSP increased. Real weekly household disposable income is adjusted with reference to the June quarter CPI.

Source: ABS, *Consumer Price Index, Australia*, December 2022; Fair Work Commission modelling.

Note: Poverty lines are based on estimates of median equivalised household disposable income in 2017–18 for September 2017 and 2019–20 for September 2021 and September 2022, adjusted for movements in household disposable income per head as calculated by the Melbourne Institute of Applied Economic and Social Research and for household composition using the modified OECD equivalence scale. C14, C10 and C4 are minimum award rates set under the *Manufacturing and Associated Industries and Occupations Award 2020*. AWOTE data are expressed in original terms. The increase of \$420 to the low and middle income tax offset has been included for September 2021.

Assumptions: Tax-transfer parameters as at September 2017, September 2021 and September 2022. Wage rates for 2017: C14 = \$694.90 pw, C10 = \$809.10 pw, C4 = \$971.90 and AWOTE of full-time adult employees = \$1569.60 pw. Wage rates for 2021: C14 = \$772.60 pw, C10 = \$899.50 pw, C4 = \$1080.60 pw and AWOTE of full-time adult employees = \$1748.40. Wage rates for 2022: C14 = \$812.60 pw, C10 = \$940.90 pw, C4 = \$1130.30 pw and AWOTE of full-time adult employees = \$1807.70. Other assumptions as per Table 8.4.

200+ employees	13.1	29.6

Note: Low-paid adult employees were defined as those paid below two-thirds of median hourly earnings in the HILDA data. Adult employees earning less than \$23.64 per hour are considered low paid (14.7 per cent of adult employees). Proportions for each characteristic sum to 100.

Individuals that reported both collective agreement and individual arrangement as their method of setting pay were reclassified to individual arrangement. * Relative standard error of between 25 per cent and 50 per cent and should be used with caution.

11. Gender equality

Table 11.1: Estimates of the gender pay gap

Measure	Male earnings	Female earnings	Gender pay gap
	(\$)	(\$)	(%)
<i>Weekly</i>			
AWOTE (November 2022)	1906.20	1650.80	13.3
EEH adult ordinary time cash earnings, non-managerial full-time (May 2021)	1809.10	1617.10	10.6
<i>Hourly</i>			
EEH adult ordinary time cash earnings, adjusted for casual loading* (May 2021)	45.50	39.42	13.4
EEH modern award-reliant employees, total cash earnings, adjusted for casual loading*# (May 2021)	28.05	27.55	1.8

Note: AWOTE refer to full-time adult employees. The gender pay gap is calculated as the difference between female's and male's earnings, expressed as a percentage of male's earnings. * Adult rate of pay employees with earnings deflated by a casual loading of 25 per cent. # Total cash earnings include overtime.

Source: ABS, *Average Weekly Earnings, Australia*, November 2022; ABS, *Microdata: Employee Earnings and Hours, Australia*, May 2021; ABS, *Employee Earnings and Hours, Australia*, May 2021.

Table 11.2: Gender differences, modern award-reliant employees, 2021

	Gender pay gap based on total hourly cash earnings	Gender hours paid for gap	Females as a share of modern award-reliant employees in industry
	(%)	(%)	(%)
Agriculture, forestry and fishing	n/a	n/a	n/a
Mining	np	np	np
Manufacturing	1.7	12.0	33.1
Electricity, gas, water and waste services	4.6	25.2	20.9
Construction	14.6	19.1	22.0
Wholesale trade	3.1	17.4	56.3
Retail trade	4.2	22.5	57.6
Accommodation and food services	6.8	16.2	61.4
Transport, postal and warehousing	17.5	26.5	30.7
Information, media and telecommunications	6.2	0.6	52.5
Financial and insurance services	13.8	20.2	67.4
Rental, hiring and real estate services	0.0	0.0	66.4
Professional, scientific and technical services	18.2	29.7	61.3
Administrative and support services	2.5	18.3	56.1
Public administration and safety	8.2	11.8	27.6
Education and training	9.2	-24.6	74.5
Health care and social assistance	3.3	9.6	79.3
Arts and recreation services	2.1	9.7	57.7
Other services	1.3	14.0	72.2
All industries	1.8	18.7	60.4*

Note: The gender pay gap is calculated as the difference between average male and average female earnings, as a share of average male earnings. Total hourly cash earnings include overtime hours paid for and is adjusted for casual loading. Industry estimates are based on individuals on adult rates of pay only. Gap in hours paid for is calculated as the difference between male and female average hours paid for per week (male minus female) expressed as a percentage of male hours paid for. n/a = not available in the EEH. np = not published due to insufficient observations in the survey. * Females as a share of modern award-reliant employees across all rates of pay is 58.1 per cent.

Source: ABS, *Microdata: Employee Earnings and Hours, Australia*, May 2021.

Chart 11.1: Gender pay gap by industry, AWOTE, November 2022

Note: AWOTE refer to full-time adult employees. The gender pay gap is calculated as the difference between average male and average female earnings, as a share of average male earnings.

13. Indicators of financial stress

Table 13.1: Financial stress experienced by all employee households

	2017	2018	2019	2020	2021
Financial stress indicators	(%)	(%)	(%)	(%)	(%)
Unable to raise \$3000/\$4000* in a week for something important	4.5	5.0	4.8	4.6	3.8
Could not pay electricity, gas or telephone bills on time	7.3	7.4	7.4	4.9	5.2
Could not pay the mortgage or rent on time	2.9	4.0	4.0	3.2	3.1
Pawned or sold something	2.2	2.5	2.8	1.9	1.6
Went without meals	1.6	2.0	2.3	1.4	1.7
Could not afford to heat home	1.6	1.7	1.8	1.0	1.1
Sought assistance from welfare/community organisation	1.0	1.1	1.1	1.3	1.0
Sought financial help from friends or family	6.1	7.3	7.3	3.9	4.6
Any stress	13.4	14.7	15.2	12.1	11.1
Low stress (1–2)	9.9	10.5	10.7	9.6	8.2
Moderate stress (3–4)	2.6	3.1	3.5	1.8	2.2
High stress (5 or more)	0.9	1.1	1.0	0.7	0.7
Observations	5011	4988	5117	4970	4883

Note: Employee households are those households whose main source of income is from wages or salary. Both partners in a couple family household, the lone parent in a lone parent household and the lone person of a lone person household must report financial stress for that particular household to be considered as such. Observations from multi-family households, other related family households and group households are excluded. *Amount is \$3000 for Waves 17 to 19, and \$4000 for Wave 20 and 21.

Source: *Household, Income and Labour Dynamics in Australia Survey, Waves 16–21.*

Table 13.2: Financial stress experienced by low-paid employee households

	2017	2018	2019	2020	2021
Financial stress indicators	(%)	(%)	(%)	(%)	(%)
Unable to raise \$3000/\$4000* in a week for something important	12.9	13.3	12.2	9.6	8.3
Could not pay electricity, gas or telephone bills on time	14.6	15.4	16.4	10.0	10.7
Could not pay the mortgage or rent on time	5.6	7.9	9.6	6.1	6.2
Pawned or sold something	4.5	4.7	6.4	4.8	3.2
Went without meals	2.8	3.8	5.5	3.1	3.4
Could not afford to heat home	3.4	4.1	3.9	2.2	2.0
Sought assistance from welfare/community organisation	2.6	3.9	2.6	3.8	2.9
Sought financial help from friends or family	11.3	13.9	14.2	9.0	8.2
Any stress	28.2	29.0	31.6	24.0	20.3
Low stress (1–2)	20.2	18.1	20.3	18.3	14.1
Moderate stress (3–4)	6.0	7.8	9.1	3.6	4.5
High stress (5 or more)	2.0	3.1	2.2	2.1	1.7
Observations	1023	981	1022	1011	987

Note: Employee households are those households whose main source of income is from wages or salary. Both partners in a couple family household, the lone parent in a lone parent household and the lone person of a lone person household must report financial stress for that particular household to be considered as such. Observations from multi-family households, other related family households and group households are excluded. Low-paid employee households are defined as those households in the bottom quintile of equivalised disposable household income for employee households. Disposable household income is equivalised using the 'modified OECD' method where each person in the household is given a score (1 for the first adult, 0.5 for subsequent adults and 0.3 for each child under the age of 15) and the income is divided by the sum of these scores. *Amount is \$3000 for Waves 16 to 19, and \$4000 for Wave 20 and 21.

Source: *Household, Income and Labour Dynamics in Australia Survey*, Waves 16–21.

14. Forecasts

Table 14.1: 2023–24 Budget, international GDP growth forecasts

	2022 (outcomes)	2023 (forecasts)	2024 (forecasts)	2025 (forecasts)
World	3.4	2¾	3	3½
Major trading partners	3.0	3¼	3¼	3½

Note: World and other East Asia growth rates are calculated using GDP weights based on purchasing power parity (PPP), while growth rates for major trading partners are calculated using Australian goods and services export trade weights.

Source: Australian Government (2023), *Budget 2023–24, Budget Paper No. 1*, May, p. 44.

Table 14.2: IMF real GDP growth projections

	2022 (outcomes)	2023 (projections)	2024 (projections)
Australia	3.7	1.6	1.7
Advanced economies	2.7	1.3	1.4
World	3.4	2.8	3.0

Change in inventories ^(c)	0.1	0	0	0
Gross national expenditure	5.1	3¼	1	2¼
Exports of goods and services	–0.3	8	6	3½
Imports of goods and services	7.0	9	4	3½
Net exports ^(c)	–1.3	0	½	0
Nominal gross domestic product	11.0	10¼	1¼	2½
Prices and wages				
Consumer price index ^(d)	6.1	6	3¼	2¾
Wage price index ^(d)	2.6	3¼	4	3¼
GDP deflator	7.0	7	–¼	¼
Labour market				
Participation rate ^(e)	66.6	66½	66¼	66¼
Employment ^(d)	3.6	2½	1	1
Unemployment rate ^(e)	3.8	3½	4¼	4½
Balance of payments				
Terms of trade ^(f)	11.9	1½	–13¼	–8¼
Current account balance (per cent of GDP)	2.0	¾	–2½	–3½
Net overseas migration ^(g)	184 000	400 000	315 000	260 000

Note: The exchange rate is assumed to remain around its recent average level — a trade-weighted index of around 60 and a \$US exchange rate of around 67 US cents. Interest rates are informed by the Bloomberg survey of market economists. World oil prices (Malaysian Tapis) are assumed to remain around US\$87/barrel. Population growth is forecast to be 2.0 per cent in 2022–23 and 1.5 per cent in 2024–25.

(a) Percentage change on preceding year unless otherwise indicated.

(b) Excluding second-hand asset sales from the public sector to the private sector.

(c) Percentage point contribution to growth in GDP.

(d) Through-the-year growth rate to the June quarter.

(e) Seasonally adjusted rate for the June quarter.

(f) Key commodity prices are assumed to decline from current elevated levels over four quarters to the end of the March quarter 2024: the iron ore spot price is assumed to decline from a March quarter 2023 average of US\$117 per tonne to US\$60 per tonne; the metallurgical coal spot price is assumed to decline from US\$342 per tonne to US\$140 per tonne; the thermal coal spot price is assumed to decline from US\$260 per tonne to US\$70 per tonne; and the LNG spot price is assumed to decline from US\$16 per tonne to US\$10/mmBtu. All bulk prices are in free-on-board (FOB) terms.

(g) Net overseas migration is forecast to continue at 260 000 in 2025–26 and 2026–27.

Table 14.4: RBA economy forecasts, growth rates

	Dec-22	Jun-23	Dec-23	Jun-24	Dec-24	Jun-25
Gross domestic product	2.7	1.7	1.2	1.4	1.7	2.1
Household consumption	5.4	1.8	1.3	1.8	2.1	2.4
Dwelling investment	-3.7	0.3	0.2	-2.4	-3.0	-0.5
Business investment	3.1	2.2	2.3	1.6	1.9	2.6
Public demand	2.6	1.1	0.9	1.2	2.0	2.4
Gross national expenditure	3.2	1.0	1.2	1.5	1.7	2.1
Imports	12.1	3.3	7.0	5.0	3.4	2.7
Exports	7.7	7.3	6.1	4.0	3.0	2.5
Real household disposable income	-3.3	-2.5	0.0	0.4	1.8	3.0
Terms of trade	7.2	-7.0	-4.5	-5.0	-4.1	-3.7
Major trading partner (export-weighted) GDP	2.3	4.3	4.0	3.5	3.5	3.7
Unemployment rate*	3.5	3.6	4.0	4.2	4.4	4.5
Employment	5.0	2.5	1.6	1.1	1.0	1.1
Wage price index	3.3	3.8	4.0	3.9	3.8	3.7
Nominal (non-farm) average earnings per hour	2.5	4.2	5.3	4.8	4.4	4.1
Trimmed mean inflation	6.9	6.0	4.0	3.3	3.1	2.9
Consumer price index	7.8	6.3	4.5	3.6	3.2	3.0

Note: Percentage changes over the year to the quarter. Forecasts finalised on 1 May. Forecast assumptions—the cash rate is assumed to peak at around 3¼ per cent before declining to around 3 per cent by mid-2025; trade-weighted index of 60, Australian dollar at US\$0.66, Brent crude oil price at US\$78 per barrel, population growth is assumed to be in line with forecasts from the Australian Government’s Centre for Population. Forecasts are rounded to the first decimal point. Lighter shaded regions are historical data. *Average rate in the quarter.

15. Costs of child care services

In its statement of 1 November 2013 in relation to the research program for the Annual Wage Review 2013–14, the Expert Panel noted that:

The Statistical Report will also refer to data on costs of child care services by providing a link to the relevant chapter in the ‘Report on Government Services’ produced by the Productivity Commission. [2013 FWCFB 8514, Attachment A, p. 3]

A link to Part B, *Child care, education and training*, from the latest Report on Government Services 2022 is provided here: <https://www.pc.gov.au/ongoing/report-on-government-services/2023/child-care-education-and-training>

17. Business surveys

In the Annual Wage Review 2015–16 Decision, the Expert Panel noted that:

Official statistics on the situation of small business come with a substantial time lag. We accept that in these circumstances, the information provided by business surveys is useful. In particular, we note the assessment by the Australian Government and the RBA that information from the main business surveys (by ACCI, NAB and Sensis) have proved to be quite reliable predictors of output and employment growth. [2016 FWCFB 3500 at para. 298]
